

## PBM Savings: Traditional vs. Pass-Through

At 90 Degree Benefits, our partnerships ensure that employers pay the lowest price for their members' prescriptions. With our managed pharmacy approach, our clients on average have experienced a **40% decrease** in their pharmacy spending. **Traditional PBMs increase the price (spread) from what they pay the pharmacy to what they charge the health plan and retain the difference as compensation.** With Pass-Through, the health plan pays no more than what the pharmacy gets paid for that prescription. Our clients have experienced immediate savings by switching from a Traditional to Pass-Through PBM.

### Pharmacy Benefit Manager Manufacturing Company (large)
