

Reverse The Pharmacy Increase Trend with *RightTurnRx*™

It may come as no surprise that existing prescription drug prices increased by 25% from 2021 to 2022.¹ As pharmacy spending projections continue to trend upwards and with an endless parade of new “fixes” and “solutions”, it can be difficult to know what to do for your clients.

That’s where RightTurnRx™ comes in. Our program provides four levels of cost enhancement, working in conjunction with multiple PBMs and pharmacy vendors.

Here’s how we secure your savings

PBM Procurement

We provide quote and savings comparisons, qualitative review, and contract negotiation to help you find the right PBM.

Alternate Funding Options

We source various alternative solutions for high-cost and specialty medications.

Clinical Cost Containment

We maximize your savings through services like prior authorization review, utilization and medical management, solutions for Gene Therapy, and more.

Contract Auditing

We conduct plan-year audits to verify contractual guarantees and recovery opportunities.
